EAW Y SET

NEW!

EAW I SET

**energy absorber recovered in a velcro bag
for an easy inspection**

Fall arrester lanyards with elastic sling in polyamide 30 mm width, fitted with energy absorber, stress indicator and double gate connectors.

The energy absorber reduce the impact force and the risk of injuries for the operator.

Available in two version, EAW I SET with a single connector and EAW Y SET with two connectors - this one allows the operator to move in complete safety due to the possibility of remaining always attached to the structure with at least one connector.

Available in two sizes (90 cm and 150 cm) and in version without connectors.
