

Gloves CRAGGY

Gloves provide hand protection against the scratching during crack climbing. They also provide maximum sensitivity and increased friction during use. Very effective hand protection for demanding climbing. Gloves don't restrain the wrist movement and don't crush the arteries on the wrist.

DESCRIPTION

Double elastic band for a little finger for greater durability.

Rubber with high friction.

Rubber pocket for velcro closure protects against the scratching and breaking.

Reinforced fastening opening.

Elastic rubber bands do not cut between the fingers.

Comfortable artificial stretch leather.

Thumb hole in the leather provides greater comfort and grip when climbing.

Velcro closure.

KEY PROPERTIES

- Velcro closure
- Elastic rubber bands for fingers
- Comfortable stretch leather
